Description of the incident, including the suspected cause of death, injury or egregious abuse or neglect:

On February 4, 2017, the agency received a report regarding a 1-year-old infant brought to the hospital with head injuries. Medical professionals who examined the child suspected head trauma due to the child's presenting symptoms, and the child was transported to another hospital. Law enforcement was contacted and initiated a criminal investigation regarding the child's suspicious injuries. Medical professionals diagnosed the infant with Physical Abuse-Abusive Head Trauma. The child passed away from related injuries on February 6, 2017. No criminal charges have been filed in this case, but the investigation remains open.

Findings by agency, including maltreatment determination and material circumstances leading to incident:

The agency collaborated with law enforcement and medical personnel to complete the assessment. The Initial Assessment completed by the agency found a preponderance of the evidence to substantiate maltreatment of physical abuse and emotional damage to the infant by the father. Medical professionals determined the infant sustained head injuries and diagnosed the child with Physical Abuse-Abusive Head Trauma. At the time of the incident, three of the father's children were under an out-of-home Child in Need of Protection or Services Order. The infant was not subject to the order. These three children will remain in out-of-home care and ongoing case management services will continue. The infant's additional siblings, residing in the home at the time of the incident, were deemed safe and remained in the home in the care of their mother.
