Developmental Assessment Tools for School-Age Children
2.27.18

Examples of assessment tools that may be used for school-age children:

- Afterschool Youth Outcomes Inventory, PASE

- Developmental Milestones of Young Children. Revised Edition. Redleaf Quick Guide. (Includes developmental milestones for children five - eight years) https://www.redleafpress.org/cw_Search.aspx?k=observational+record (pages 54 – 77).

- Personal Learning Plans

- National Institute on Out-of-School Time (NIOST): Survey of Afterschool Youth Outcomes (SAYO)

- Collections of Youth Outcome Measure Tools

NOTE: The tool will need to be cross walked with the School Age Curricular Framework. It is the program's responsibility to demonstrate that it is being conducted according to the rules of the authors of the tool. **Assessments that are designed by the program may be used if, in the opinion of the Consultant/Rater, they are appropriate.**
